*For immediate release*

### **Discovery-Corp Commences Drill Program on Galaxy Property**

**Vancouver** - Discovery-Corp Enterprises Inc. announces that its 2012 exploration program has commenced on its wholly-owned Galaxy Property located near the New Afton Mine in Kamloops, British Columbia, Canada. This phase will focus on drilling to validate the 3-D model, which was based on historical drilling of the Galaxy deposit, and to determine if mineralization continues below the thrust fault that is the historical bottom of the model.

Discovery-Corp will be working for the next 30 days to build drill pads, mobilize, drill and split core to get samples to send to the assay lab by mid-October. Discovery-Corp expects the exploration program will add economic value to the Galaxy deposit by assaying for precious metals that have not been previously tested.

-30-

Discovery-Corp is a junior exploration company with its head office in Vancouver, British Columbia, Canada. Discovery-Corp owns 100% of the Galaxy property in Kamloops, British Columbia, Canada. Discovery-Corp's other asset is the Rock Creek Ranch, located in North Central Nevada at the intersection of the Getchell and Battle Mountain-Eureka gold trends. Discovery-Corp is focused on finding high quality gold and copper properties.

Discovery-Corp's Galaxy property is located in the Afton camp in Kamloops, BC. New Gold's \$765 million gold-copper mine is 7 kilometers away. New Gold's mine commenced production in June 2012 and this 11,000 ton per day mill has a 12 year mine life. The Ajax property being developed by KGHM (a multi-billion dollar Polish mining conglomerate) completed a positive feasibility study for its copper-gold project in 2012 and is proposing to build a 60,000 ton per day mill within 4 kilometers from Discovery-Corp's Galaxy property. The Company believes the Galaxy project has similar geology and could be a significant find on its own as well as represent a valuable asset to the right buyer.
