NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Chartered Professional Accountants of Canada for a review of interim financial statements by an entity's auditor.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 1 – NATURE OF OPERATIONS AND GOING CONCERN

Discovery-Corp Enterprises Inc. (the “Company”) was incorporated under the laws of British Columbia on May 6, 1986 and maintains its head office at 125A - 1030 Denman Street, Vancouver, British Columbia, Canada, V6G 2M6. The Company’s registered and records office is at 700 - 401 West Georgia Street, Vancouver, British Columbia, Canada, V6B 5A1. The Company is an exploration stage company engaged in exploration for critical minerals and precious metals. The recoverability of amounts shown for resource property interests and the Company’s continued viability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete their development, and upon future profitable production or proceeds from the disposition of its interests. There are no assurances that the Company will be successful in achieving these goals.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Several adverse conditions may cast significant doubt on the validity of this assumption. The Company has incurred significant losses since inception and as at April 30, 2026 the Company has an accumulated deficit of \$7,314,218 (July 31, 2025 - \$7,227,064). The company incurred a net loss of \$87,154 for the nine month period ending April 30, 2026 (July 31, 2025 income \$625,532). The Company’s ability to continue as a going concern is dependent upon its ability to secure additional financing on a timely basis and achieve sufficient positive cash flows from operating activities to cover obligations and expenses. Management may actively seek additional financing opportunities through the issuance of equity as the need for capital arises. These condensed consolidated interim financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

Management is actively engaged in the review and due diligence on new projects, is seeking to raise the necessary capital to meet its funding requirements and has undertaken available cost-cutting measures. There can be no assurance that management’s plan will be successful. If the going concern assumption is not appropriate for these condensed consolidated interim financial statements, then adjustments would be necessary in the carrying value of assets and liabilities, the reported expenses and the condensed consolidated interim statement of financial position classifications used. Such adjustments could be material.

NOTE 2 – STATEMENT OF COMPLIANCE

These condensed consolidated interim financial statements, including comparatives, have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”) and in accordance and compliance with International Accounting Standard (“IAS”) 34 Interim Financial Reporting.

These unaudited condensed consolidated interim financial statements, including comparatives, of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), and should be read in conjunction with annual audited statements. The preparation of condensed consolidated interim financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the condensed consolidated interim financial statements are disclosed in Note 3. The accounting standards set out in Note 3 have been applied consistently to all periods presented.

Approval of the Condensed Consolidated Interim Financial Statements

These condensed consolidated interim financial statements were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on June 16, 2026.

DISCOVERY-CORP ENTERPRISES INC.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 3 – SUMMARY OF MATERIAL ACCOUNTING POLICIES

These consolidated interim financial statements have been prepared under the historical cost convention, except for certain financial instruments measured at fair value. In addition, these consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. Amounts are stated in Canadian dollars, which is the functional and reporting currency for the Company and its subsidiaries. The following reflects the significant accounting policies:

(a) Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Prebble Resources USA, Inc. (a Nevada corporation). During the year ended July 31, 2022, the Company incorporated under the law of British Columbia two wholly owned inactive subsidiaries, Galaxy Strategy Corp. and 1369569 B.C. Ltd. A subsidiary is an entity in which the Company has control, where control requires exposure or rights to variable returns and the ability to affect those returns through power over the investee. All intercompany balances and transactions have been eliminated upon consolidation.

(b) Exploration and Evaluation

The Company is in the exploration stage and capitalizes all acquisition costs related to its resource property interests until such time as the properties are put into commercial production, sold or abandoned. The Company expenses all exploration expenditures in the period incurred. Amounts shown as resource property interests represent acquisition costs incurred to date less amounts amortized and/or written off, and do not necessarily represent present or future values. If a property is put into commercial production, the acquisition costs relating to that property will be depleted based upon the proven reserves available.

From time to time, the Company may acquire or dispose of a resource property pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. When the amount of recoveries exceeds the total amount of capitalized costs of the property, the amount in excess of costs is recorded in income.

(c) Share-based Payments

The Company has a stock option plan that is described in Note 8(c). The Company may grant share options to acquire common shares of the Company to directors, officers, employees and consultants. The fair value of share-based payments to employees is measured at grant date using the Black-Scholes option pricing model and is recognized over the vesting period using the graded method. Fair value of share-based payments to non-employees is recognized and measured at the date the goods or services are received based on the fair value of such goods or services. If it is determined that the fair value of goods and services received cannot be reliably measured, the share-based payment is measured at the fair value of the equity instruments issued using the Black-Scholes option pricing model. Upon option expiry, related amounts are transferred from reserves to deficit.

For both employees and non-employees, the fair value of share-based payments is recognized as an expense with a corresponding increase in reserves. The amount recognized as expense is adjusted to reflect the number of share options expected to vest. Consideration received on the exercise of stock options is recorded in share capital and the related share-based payment in reserves is transferred to share capital.

DISCOVERY-CORP ENTERPRISES INC.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 3 – SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

(d) Common Shares

Instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(e) Impairment of Non-current Assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually. Other non-financial assets, including resource property interests, are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets. An impairment loss is charged to net loss, except to the extent they reverse gains previously recognized in other comprehensive income (loss).

(f) Mining Exploration Tax Credit

The Company recognizes mining exploration tax recoveries in the period in which the related recoveries are received on qualified resource expenditures incurred in Canada. Management's judgment is applied in determining whether the resource expenditures are eligible for claiming such credits. The amount recoverable is subject to review and approval by the taxation authorities.

(g) Financial Instruments

i) Financial Assets

The Company recognizes a financial asset when it becomes a party to the contractual provisions of the instrument. The Company classifies financial assets at initial recognition as financial assets: measured at amortized cost, measured at fair value through other comprehensive income or measured at fair value through profit or loss.

Financial assets measured at amortized costs

A financial asset that meets both of the following conditions is classified as a financial asset measured at amortized cost.

- The Company's business model for such financial assets is to hold the assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the amount outstanding.

A financial asset measured at amortized cost is initially recognized at fair value plus transaction costs directly attributable to the asset. After initial recognition, the carrying amount of the financial asset measured at amortized cost is determined using the effective interest method, net of impairment loss, if necessary.

DISCOVERY-CORP ENTERPRISES INC.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 3 – SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)**Financial Instruments (continued)***Financial assets measured at fair value through other comprehensive income ("FVTOCI")*

A financial asset measured at fair value through other comprehensive income is recognized initially at fair value plus transaction cost directly attributable to the asset. After initial recognition, the asset is measured at fair value with changes in fair value included as "financial asset at fair value through other comprehensive income" in other comprehensive income.

Financial assets measured at fair value through profit or loss ("FVTPL")

A financial asset measured at fair value through profit or loss is recognized initially at fair value with any associated transaction costs being recognized in profit or loss when incurred. Subsequently, the financial asset is re-measured at fair value, and a gain or loss is recognized in profit or loss in the reporting period in which it arises.

The Company derecognizes a financial asset if the contractual rights to the cash flows from the asset expire, or the Company transfers substantially all the risks and rewards of ownership of the financial asset. Any interests in transferred financial assets that are created or retained by the Company are recognized as a separate asset or liability. Gains and losses on derecognition are generally recognized in profit or loss. However, gains and losses on derecognition of financial assets classified as FVTOCI remain within accumulated other comprehensive income (loss). The Company's cash and reclamation bonds are classified as FVTPL.

ii) Financial Liabilities

Financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument. A financial liability is derecognized when it is extinguished, discharged, cancelled or when it expires. Financial liabilities are classified as either financial liabilities at fair value through profit or loss or financial liabilities subsequently measured at amortized cost. All interest-related charges are reported in profit or loss within interest expense, if applicable. The Company's financial liabilities include accounts payable and accrued liabilities and classified as financial liabilities subsequently measured at amortized cost.

iii) Fair Value Hierarchy

The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Cash, reclamation bonds, accounts payables and accrued liabilities are recorded at their carrying amounts and approximate their fair values due to their short-term nature.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 3 – SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)**(h) Significant Accounting Estimates and Judgments**

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates, which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and may affect both the period of revision and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Critical accounting estimates

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial year.

Critical accounting judgments

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements include, but are not limited to, the following:

Going concern

The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period. Management assesses the amount of cash on hand at each reporting date to determine whether the Company pursues any exploration programs or adjusts management salaries and other expenses in the following year.

Exploration and evaluation assets

Management is required to make judgments on the status of each mineral property and the future plans with respect to finding commercial reserves. Resource exploration and development is highly speculative and involves inherent risks. While the rewards if an ore body is discovered can be substantial, few properties that are explored are ultimately developed into producing mines. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Estimates and assumptions made in the realization of the Company's investment in mineral property interests may change if new information becomes available. New information may become available during the use of these assets that causes the Company to adjust its estimates.

Cash-generating units ("CGUs") are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's mineral properties.

In respect of costs incurred for its mineral properties, management has determined that exploratory drilling, evaluation, and related costs incurred, which have been capitalized, continue to be appropriately recorded on the consolidated statements of financial position at its carrying value as management has determined there are no indicators of impairment for its mineral properties as at July 31, 2025 and 2024.

DISCOVERY-CORP ENTERPRISES INC.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 4 – RISK MANAGEMENT**(a) Credit Risk**

Credit risk is the risk of financial loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk with respect to its cash and reclamation bonds. The Company limits exposure to credit risk by maintaining its cash and reclamation bonds with major financial institutions.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows required for operations and anticipated investing and financing activities.

At April 30, 2026, the Company had cash of \$134,598 (July 31, 2025 - \$348,058) available to apply against short-term business requirements and current liabilities of \$6,868 (July 31, 2025 - \$143,808). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

(c) Market Risk

Market risk is the risk that the fair value or future cash flows from the Company's financial instruments will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk. The objective of market risk management is to manage and control risk exposure within acceptable parameters, while optimizing the return. The Company is not exposed to significant market risk.

NOTE 5 – CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the development of its resource property interests. In the management of capital, the Company includes the components of equity as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, option its resource property interests for cash and/or expenditures or dispose of assets. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary.

The Board of Directors does not establish a quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company has not changed its capital risk management strategy during the period ended April 30, 2026 and is not subject to externally imposed capital requirements.

NOTE 6 – RECLAMATION BONDS

The reclamation bonds are comprised of a \$1,000 (July 31, 2025 - \$1,000) cash deposit plus term deposits held in a financial institution as security for reclamation obligations pursuant to the *Mines Act and Health, Safety and Reclamation Code for Mines* in British Columbia. The \$2,000 (July 31, 2025 - \$2,000 at 2.75%) term deposit bears interest at 2% per annum and matures September 15, 2026. The \$5,000 (July 31, 2025 - \$5,000 at prime rate less 2.7%) term deposit bears interest at prime rate less 2.7% and matures January 14, 2027. The deposits are renewed annually.

DISCOVERY-CORP ENTERPRISES INC.

(an exploration stage company)

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 7 – RESOURCE PROPERTY INTERESTS

	April 30, 2026	July 31, 2025
Galaxy Property, British Columbia, Canada	\$ 20,916	\$ 20,916

Galaxy Property, British Columbia, Canada

The Company holds an undivided 100% interest in seven mineral claims and two Crown-granted mineral claims in the Kamloops Mining Division of British Columbia, Canada, known as the Galaxy Property.

Environmental

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the resource properties, the potential for production on the property may be diminished or negated.

Title

Title to resource properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its resource properties and, to the best of its knowledge, title to all its properties are in good standing. However, such properties may be subject to prior agreements or transfer and title may be affected by undetected defects.

Realization

The investment in resource properties comprises a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the confirmation of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

NOTE 8 – EQUITY

(a) Authorized: unlimited number of common shares without par value

(b) Issued:

During the years ended July 31, 2025 and July 31, 2024, no shares were issued.

No shares were issued during the nine month period ending April 30, 2026.

DISCOVERY-CORP ENTERPRISES INC.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the nine month periods ended April 30, 2026 and 2025

(Unaudited)

(Expressed in Canadian dollars)

NOTE 8 – EQUITY (continued)**(c) Stock Options**

The Company established a stock option plan under which it may grant stock options totaling in aggregate up to 10% of the Company's total number of shares issued and outstanding on a non-diluted basis. The stock option plan provides for the granting of stock options to employees and persons providing investor-relation or consulting services up to a limit of 5%, 2% and 2%, respectively, of the Company's total number of issued and outstanding shares per year. The stock options are fully vested on the date of grant, except for options granted to persons providing investor relations services, which vest over a twelve-month period. The option price must be greater or equal to the discounted market price on the grant date and the option expiry date cannot exceed five years after the grant date.

The Company applies the fair value method using the Black-Scholes option pricing model in accounting for its stock options granted. There were no options granted or outstanding during the years ended July 31, 2025 and July 31, 2024 and the nine month period ending April 30, 2026.

(d) Warrants

There are no warrants outstanding as of April 30, 2026 or April 30, 2025.

NOTE 9 – RELATED PARTY TRANSACTIONS

The consolidated financial statements include transactions with directors and/or officers of the Company and/or corporations related to or controlled by them. The remuneration of directors and other key management personnel was as follows:

	Three Month Period ended April 30, 2026	Nine Month Period ended April 30, 2026	Three Month Period ended April 30, 2025	Nine Month Period ended April 30, 2025
Short-term employee benefits (Note 11 and 12)	\$ 29,700	\$ 89,100	\$ 58,587	\$ 117,987

Key management personnel were not paid any post-employment benefits, termination benefits or other long-term benefits during the respective periods.

NOTE 10 – SEGMENT DISCLOSURE

The Company operates in one business segment, which is the acquisition and exploration of mineral property interests, and its non-current assets are held in Canada.
